Overview

ArtfulBits DateTime Column is similar to standard SharePoint DateTime column. Essential feature of our component is cross-browser support (IE, Mozilla, Opera, Safari and Google Chrome compatible).

Min and Max date allows to define date range for this column values. The easiest way of adding cross-browser support for existing SharePoint DateTime column is to use ArtfulBits DateTime column conversion feature.

Apart from the common Gregorian calendar, this also includes several other calendars that use different year and month systems, such as the Gregorian Arabic calendar. All supported calendars are listed below:

- Gregorian
- Gregorian Middle East French
- Gregorian Arabic
- Gregorian Transliterated English
- Gregorian Transliterated French

Column settings page allows customizing column according to your needs (restrict date range, select date and time format, set default value):

You can specify a minimum and maximum allowed value:

Min:  Max: 

Date and Time Format:

Date Only Date & Time

Default value:

(None)

Today's Date

Select an existing Date and Time column and click 'Convert' button to convert it to ArtfulBits DateTime column
